[SUBJECT: SKILLBRIDGE/ FRONT-END ENGINEERING ROLE]

Mr. Justin Paine
VP, Global Head of Trust & Safety
Cloudflare
San Francisco, CA

Dear Mr. Paine,

Hi, my name is Francis. I'm currently based here in Japan serving the United States Air Force. I am completing my active service as a commissioned officer 5 January 2024 and looking for an internship through the military program, **SkillBridge**, paid for by the United States Department of Defense. I would like to participate in the said program with Cloudflare commencing **August 2023** to further and challenge my capabilities in front-end engineering.

I am a data-driven leader focused on information security, penetration testing, software engineering and development. Before earning my commission in the military, I have worked as a Content Operations Specialist, Trust & Safety at Palo, Alto CA for a multinational tech company headquartered at Mountain View, CA.

I have created a sample dashboard that tracks ad decisions for Google Play Store and the App Store:

<https://github.com/hotonoodle/mobile-ads>

My problem solving and research skills will be an asset for a company looking for someone that has experienced in data wrangling, technical writing, and advertising policies.

Thank you for taking the time to read this letter and hope to get a response from you soon!

Respectfully,

FRANCIS EDWARD DEL ROSARIO, 1LT, USAF
